TMT INVESTMENTS PLC
("TMT" or the "Company")

Investment in Send A Job, Inc.

TMT Investments PLC, which invests in high-growth, internet-based companies across a variety of sectors, is pleased to announce the completion of an investment in Send A Job, Inc. (www.sendajob.com)

Incorporated in San Diego, California, Send A Job, Inc. was founded by Erez Marom, Idan Kadosh and Saar Kohanovitch, who combined their IT and Field Service Management ("FSM") knowledge and experience to form Send A Job in 2013. Send a Job caters to a wide range of over 34 field services, ranging from construction, roofing and electricians to computer repair, junk removal and pest control.

The Field Service Management industry is growing at a high rate and is expected to rise exponentially from \$1.58 billion in 2014 to \$3.52 billion in 2019 due to rapid technological developments in the sector. Today, companies are demanding real-time based solutions for their field workers, allowing them to accomplish their tasks without any delay or interruption.

Send A Job is a Field Service Management CRM software aimed at helping service business owners manage their business with ease. Send A Job is cloud-based, mobile-enabled, and very flexible, making it an ideal choice for a variety of service industries. Send A Job aims at combining as many aspects of the FSM industry's needs as possible under one suite, specifically enabling businesses to track leads, schedule jobs, track sales, manage field teams, use call-tracking solutions and even monitor field technician calls with creative phone masking features.

Erez and Idan are two service industry veterans. Both started working in a service van and continued to create a successful service business spanning across all of southern California. From there they formed Image & Code, a web-marketing agency that specializes in consulting, advertising and developing service businesses. When Erez and Idan needed to bring their vision to life, Saar Kohanovitch, a web application developer with 10 years experience, brought the pieces together into the Send A Job CRM solution.
